

Joanna Robin Bernhardt

University of Guelph, Guelph, Canada | joey.bernhardt@uoguelph.ca | www.bernhardtlab.org

Education

PhD, Zoology, University of British Columbia	2018
BSc, Biology, Brown University	2009

Professional Positions held

Assistant Professor, Department of Integrative Biology, University of Guelph	2022 -
Hutchinson Fellow & NSERC Postdoctoral Fellow, Yale University & University of British Columbia	2020-2022
Nereus Postdoctoral Fellow, Eawag & McGill University	2018-2020
Ecosystem Services Analyst, The Natural Capital Project, Stanford University	2010-2011

Publications (Google Scholar total citations = 6590; h-index = 26)

TOTAL Published: 41 journal publications; 3 book chapters; 4 technical reports

Five publications relevant to this project:

Bernhardt, J.R., O'Connor, M.I., Sunday, J.M., and A. Gonzalez, 2020. Life in fluctuating environments. *Philosophical Transactions of the Royal Society B*.

Bernhardt, J.R., Kratina, P, Pereira, A, Tamminen, M., Thomas, M.K.T, and A. Narwani, 2020. The evolution of competitive ability for essential resources. *Philosophical Transactions of the Royal Society B*.

Bernhardt, J.R., Sunday, J.M., Thompson, P.L. and M.I. O'Connor, 2018. Nonlinear averaging of thermal experience predicts population growth rates in thermally variable environments. *Proceedings of the Royal Society B*.

Bernhardt, J.R., Sunday, J.M. and M.I. O'Connor, 2018. Metabolic theory and the temperature-size rule explain the temperature dependence of population carrying capacity. *The American Naturalist*. 192(6),

Bernhardt, J.R. and H.M. Leslie 2013. Resilience to climate change in coastal marine ecosystems. *Annual Review of Marine Science*.

Major Awards and Research Grants (selected)

Early Career Award, Canadian Society for Ecology and Evolution	2022
L'Oréal UNESCO for Women in Science Award	2021
Canada Foundation for Innovation John Evans Leadership Fund	2023
NSERC Discovery Grant	2023
NSERC New Frontiers Grant (Co-PI)	2024
NSERC Alliance Grant (Co-PI)	2024

Synergistic Activities

Advisor: 3 postdoctoral fellows, 5 graduate students, >30 undergraduate students

Working groups (selected):

How does life deal with uncertainty in fluctuating environments? Canadian Institute for Ecology and Evolution, Montreal, Canada (co-PI, 2020-2021)

Rate summation approaches to predicting organismal performance in fluctuating environments, VectorBiTE Research Coordination Network. (Co-PI, 2019-2023)

Invited talks: Over last 5 years - 8 invited or plenary talks at scientific conferences; 29 departmental seminars
